

Dear Friends,

Thank you for your emails asking about us in Costa Rica.

Today Costa Rica is suffering from a peak that has caused all of our hospitals to collapse with COVID-19 patients with over 3,000/day. It is not getting better but has gotten worse. We ask for urgent prayer as 2 of our full time staff have been infected with the virus. Angela, our nurse and Marielos, our dental assistant. We have been very cautious and upped our cleaning and sanitizing. Marielos' sister got infected at her job and spread the virus to 12 family members and 3 are in the hospital, including her mother. Our nurse is very sick.

WE would like to ask for prayer for the remaining staff so that we will be able to stay safe and the families involved will be able to heal completely.

Thank you so much for your prayers and support.

Blessing, Lillian
