

# Congo *Health* Connection

## Progress

We are so pleased with the progress being made towards major hospital improvements. Some changes, like hospital erosion control around the pediatric ward and improving the Pediatric ICU space, are able to be done with local resources. Other parts of the hospital improvement project will take major outside investment, like expanding the Adult ICU, adding new resident housing for the 6 new residents we are recruiting and providing a climate-controlled warehouse for storing and distributing medications. God has graciously provided a gift to the hospital of \$500,000. We need to at least match that amount in additional gifts. Want to jump in??

Steve Keyser, Kathy's brother, recently came to Vanga to update the master plan and work on finalizing work on the priorities.

Revised Pediatric ICU WING
